Excerpt from Modern Methods of Ford Repairing: A Complete Manual for the Ford Repairman, Explaining the Use of All the Up-to-Date Tools and Shop Equipment and Minutely Describing the Methods of Performing the Work on All the Different Mechanical Parts of the Car HE business of repairing Fords has come to be such an enormous one and T open to such competition that the man who expects to make a success of it is forced to use the most up-to-the-minute methods, tools and machinery available for the purpose. This book is designed to give in a clear, concise and thorough way all the detail operations in repairing and overhauling the Ford mechanical units using the best and quickest methods and employing the tools and machinery that will save time and labor and insure jobs as nearly perfect as it is possible to get out. Service work on all makes of cars is slowly but surely turning toward factory production methods and this is more true of Ford' service than of any other car. Repairmen are realizing that to produce service in quantity and at a low figure it is of vital importance to specialize and to use special tools and equipment. The all around mechanic is rapidly giving way to the motor man or the rear assembly man. When a man specializes on one job, he becomes more proficient, does the job quicker and also does it better.
